The new Wellness Oasis in Romantik Hotel Sackmann in the heart of the Black Forest. Founded in 1927 and now in the hands of the third generation, the feel-good idea dominates here – an inexhaustible variety of aromas for all tastes.

Top chef Jörg Sackmann has fulfilled a wellness dream in his Romantik Hotel in the Black Forest. In cooperation with the world's leading planners in this sector, Schletterer Wellness & Spa Design, and the experienced hotel and wellness architects Vögele, a variety of aromatic thermal baths with a stylish ambiance has been created over an area of 1,000 m² in which the proprietor's culinary leitmotiv is clearly evident. The favoured aromas from Sackmann's culinary arts find expression in the spa area, whether in flower and herb steam baths, the Himalaya salt-stone sauna, or the wine and honey vaporised in the Finnish kelo spruce sauna. Fitness, massage and rest rooms, ayurveda applications and an indoor swimming pool round off your options. Here, it is not a matter of checking in, but of arriving and feeling well cared for in body and soul.

Linear diffuser INDUL in Aqua rest room

Function linear diffuser INDUL

The supply air is divided into fine individual jets which distribute the supply air into the room at an angle of 45° alternately to the left and to the right. The result is an especially uniform air distribution with an optimal diffuse ambient air flow, and no noticeable draughts.

System advantages

- Completely draught-free air distribution
- Low diffuser widths, from 15 mm
- Unobtrusive installation in ceiling joints
- Temperature differences up to -14 K
- Light, clean ceilings due to fine-jet characteristics
- Simple, quick and clean installation in all ceiling systems
- Special installation kit for plaster ceilings

Feel-good climate in wellness area

Optimised air-conditioning technology and design are inseparable when it is a question of comfort. An attractive ceiling design and a quiet, space-saving and reliable air-conditioning system need to harmonise with each other. Especially in a wellness area, an optimised air-conditioning system is a prerequisite for guests' well-being. Here everything has to be spot on: comfortable warmth, low ambient air velocities, and the right illumination. Bathing and rest rooms, saunas, massage centres and cooled areas, and, not least, compliance with regional and international standards for use of energy and air-conditioning systems. Here the demands of a hotel and its guests know no limits.
