

Comfort Ceiling Fan Coil System INDULVENT ec

EURONICS Deutschland eG, Ditzingen

EURONICS Deutschland eG is the largest retail trade cooperation for consumer electronics. The product ranges for their medium-sized specialist stores focus on consumer electronics, PCs/multimedia, telecommunications, photography and domestic appliances. The headquarters of EURONICS Deutschland eG is in Ditzingen and employs around 300 people. In the financial year 2010/2011, they generated a turnover of approximately 1.72 billion euro.

INDULVENT ec - Comfort Ceiling Fan Coil System

Local ceiling fan coil systems allow the flexible use of available space. For high comfort requirements, INDULVENT ec ensures draught-free ambient air flow with high cooling capacity and low sound power levels. The compact unit employs a fan with energysaving EC

Advantages:

- Draught-free ambient air distribution with cooling capacity up to 2600 W
- Low sound power levels
- Only electrical, cooling water and condensate connections required
- Energy-saving EC technology
- Stepless power regulation
- Integrated condensate pump
- Open BUS architecture

Building:	Euronics administration Ditzingen
Architects:	Architects Schmelzle + Partner BDA Hallwangen
Planning office:	Merkle Ingenieurgesellschaft Heidenheim
Comfort Ceiling Fan Coil System:	INDULVENT ec
Combined inlet and outlet:	INDULCLIP Z-A
Type of ceiling:	fibre acoustic ceilings
