

Ceiling fan coil system INDULVENT ec

Salzburg Airport

With approx. 1.7 million passengers each year, the airport is Austria's second largest airport and is named after Salzburg-born composer Wolfgang Amadeus Mozart. Salzburg Airport presents itself as a modern regional airport that creates jobs and is a powerful investor that is playing an ever increasing role with regard to the economy and tourism.

New ventilation systems have been installed in the control centre to ensure a fresh and pleasant interior climate.

INDULVENT ec – Comfort Ceiling Fan Coil System:

Local ceiling fan coil systems allow the flexible use of available space. For high comfort requirements, INDULVENT ec ensures draught-free ambient air flow with high cooling capacity and low sound power levels. The compact unit employs a fan with energysaving EC technology.

Advantages:

- Draught-free ambient air distribution with cooling capacity up to 2600 W
- Low sound power levels
- Only electrical, cooling water and condensate connections required
- Energy-saving EC technology
- Stepless power regulation
- Integrated condensate pump Open BUS architecture

Building:	Control centre, Salzburg Airport
Planning office TGA:	Dick & Harner GmbH, Salzburg
System:	INDULVENT ec
Combined inlet and outlet:	INDULCLIP Z-A
Type of ceiling:	Metal-coffered ceiling
Cooling load:	110 W/m²
